

CALIBRATION

Observed + CMIP6
1981-2000

Estimate transfer functions
wet-day adjustment + QDM

FREEZE

INDEPENDENT VALIDATION

CMIP6 + withheld observations
2001-2014

Apply frozen functions
no re-estimation

Paired evaluation
raw versus corrected, model x station

Uncertainty and robustness
validation-year bootstrap + cap sensitivity

Validation observations never enter transfer-function estimation.
