

Probability distribution of daily rainfall for observed data, raw CMIP6 simulations, and bias-corrected rainfall
Wet-day threshold $\geq 1.0 \text{ mm day}^{-1}$ | Period: 1981–2014

(a) Full Distribution — Wet-Day Rainfall

All stations pooled | Threshold $\geq 1.0 \text{ mm day}^{-1}$

(b) Heavy Tail ($> \text{P95 of Observed}$)

Magnified view of extreme rainfall frequency
