

Statistical Significance Testing — Wilcoxon Signed-Rank Test (Non-Parametric, One-Tailed)
H₁: QDM Bias Correction Significantly Reduces Errors vs Raw CMIP6 | Obs: 1981–2014 | FDR = Benjamini-Hochberg correction

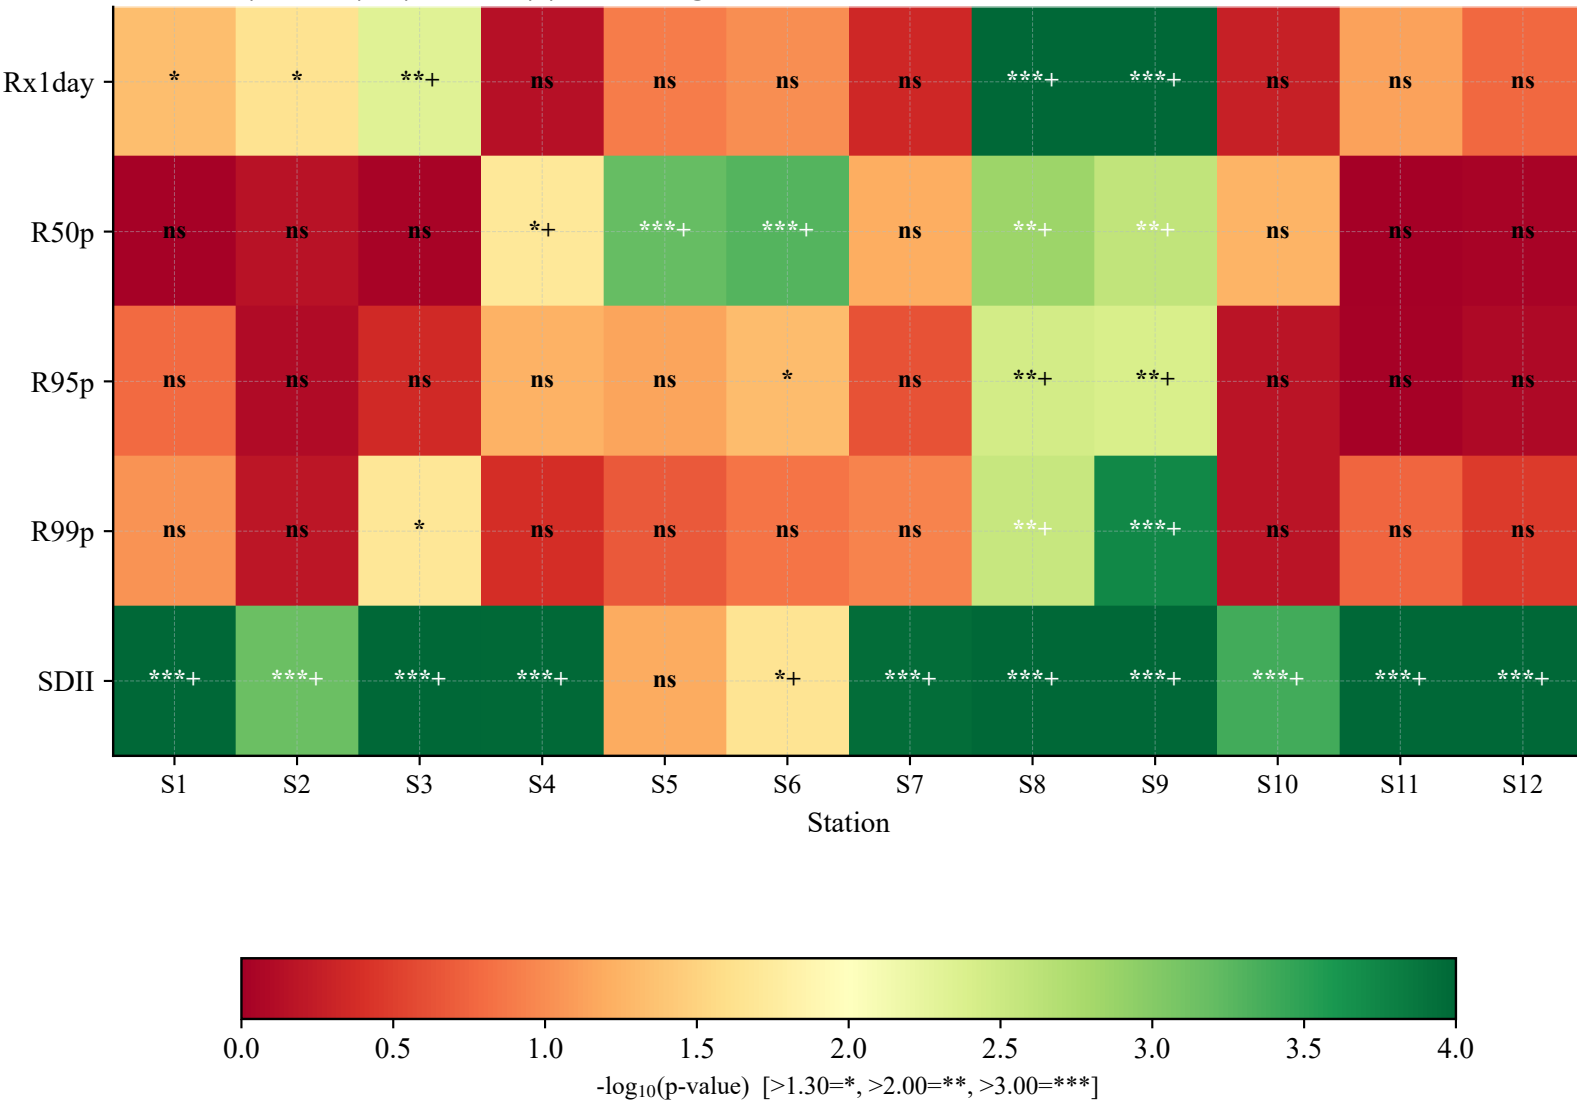

(a) Wilcoxon Signed-Rank Test — Daily Absolute Errors

H₁: |err_{BC}| < |err_{Raw}| (one-tailed) | Colour: dark green=***, green=**, light=*

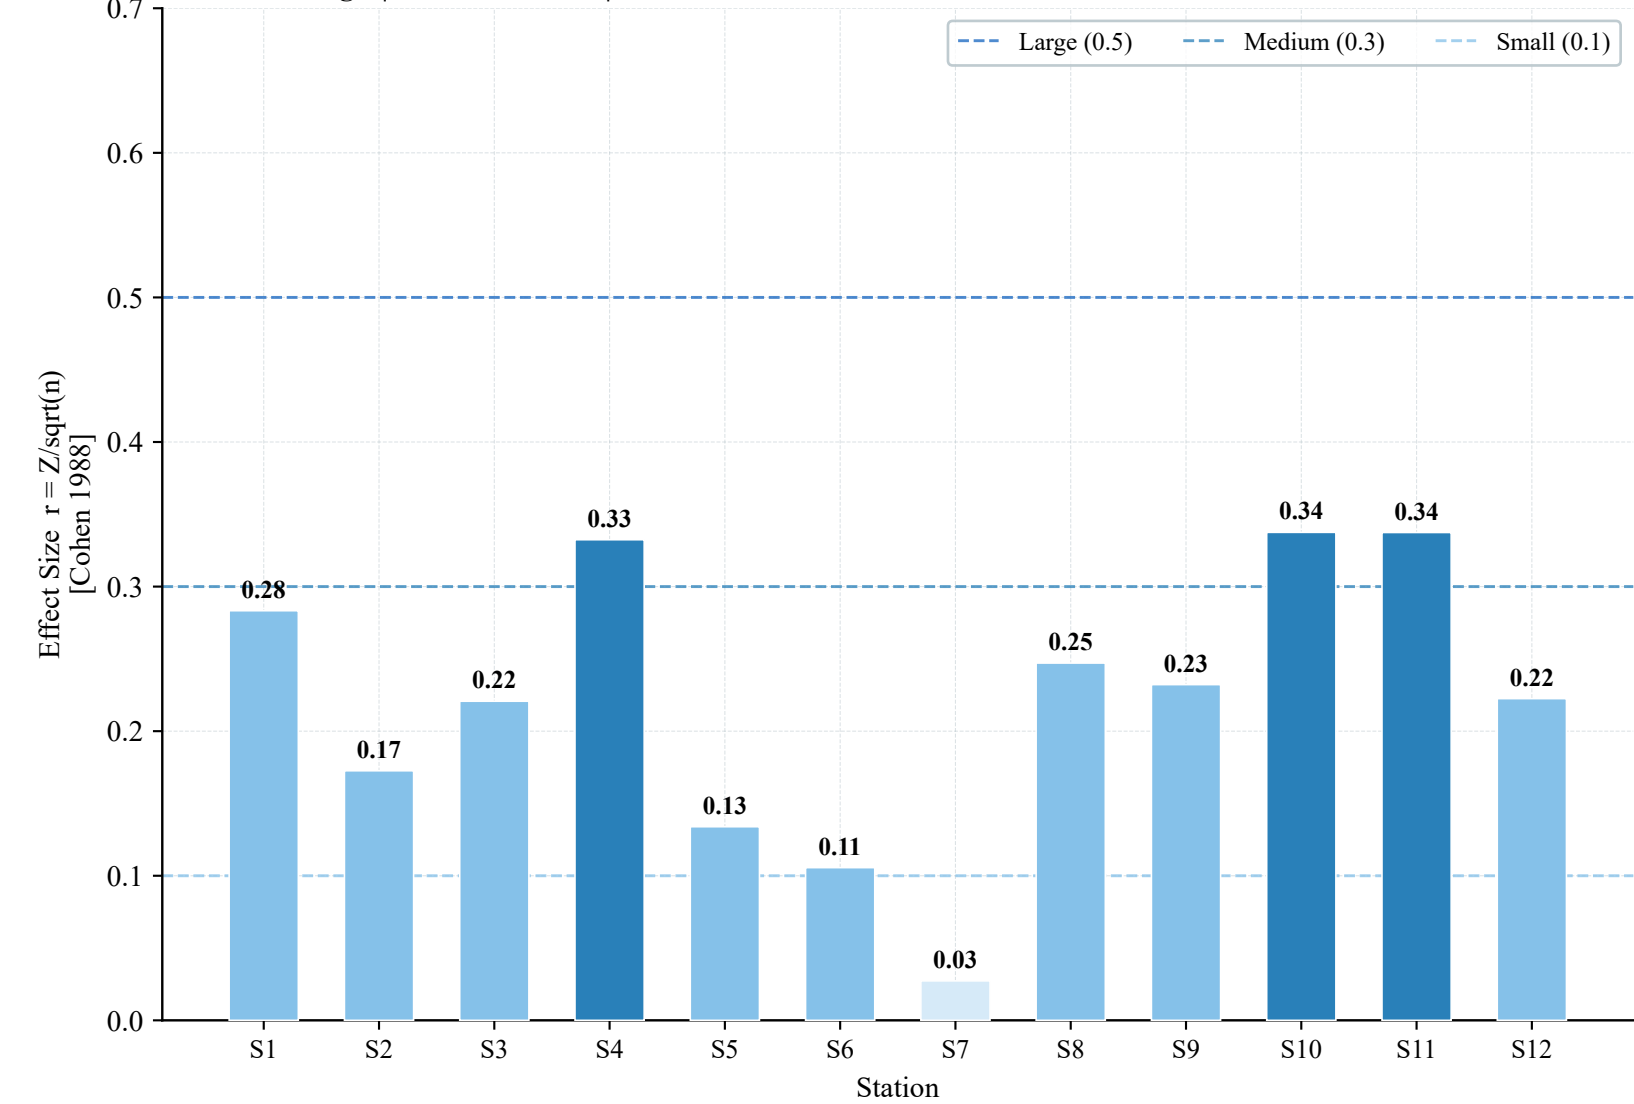

(b) Wilcoxon Signed-Rank Test — Extreme Index Errors

Annual |BC-Obs| vs |Raw-Obs| | +: FDR significant

(c) Effect Size — Daily Error Wilcoxon Test

r >= 0.5 large | >= 0.3 medium | >= 0.1 small

(d) Proportion of Stations — Significant Improvement After QDM

Uncorrected p < 0.05 vs FDR-corrected q < 0.05
